Egor Siriukin

UI/UX Designer | Game UI Designer

Saint Petersburg, Russia | +7 (910) 615-82-26 | siriukin2015@gmail.com

Russian citizen; authorized to work in Russia | Open to relocation and business travel | Full-time: on-site, remote or hybrid

SKILLS

UI/UX and game UI: user flows, prototyping, navigation, visual hierarchy, interface states, UI kits, components, Auto Layout, web design

Tools: Figma, Adobe Photoshop, Illustrator, After Effects, CorelDRAW, Blender 3D; Midjourney, Stable Diffusion, ComfyUI, Adobe Firefly, Nano Banana, ChatGPT

Visual design: composition, color correction, retouching, branding and identity, logo design, concept design, digital and social media design, motion design, presentations, advertising campaigns, outdoor advertising, print production and cross-channel adaptation

PROFESSIONAL EXPERIENCE

RedBoon | UX/UI Designer
March 2026 – Present | *Remote*

- Worked on visual materials for Knock on the Coffin Lid, a Unity-based roguelike card game, and the design of its website, including page structure, navigation and transitions.
- Developed user flows and interactive Figma prototypes; built Auto Layout designs, reusable components, interface states and a UI kit.
- Aligned element behavior and technical constraints with developers and handed off designs and graphic assets.
- Created graphics in Photoshop and Illustrator; used Midjourney, Stable Diffusion via ComfyUI and Nano Banana Pro for references, visual exploration and image refinement.
- Designed and prototyped interfaces for Crash and Tower web mini-games; mapped the Crash player journey from round start to cash-out and result display.

Lesta Games | UI Designer
May 2025 – February 2026 | *Saint Petersburg*

- Performed UI and 2D design work for World of Tanks, World of Warships and Tanks Blitz.
- Designed game UI elements and states and built a UI kit; aligned behavior and requirements with developers, prepared assets and supported implementation.
- Created key visuals, banners and animated graphics for in-game events, updates and seasonal activities.
- Adapted assets for game portals, launcher, social media, email, App Store and Google Play; created templates for multiple formats.
- Aligned visual solutions with art leads, producers and marketing; used Photoshop and AI tools for concepts, references, image refinement and promotional copy options.

Union / Outdoor Advertising | Lead Graphic Designer
July 2023 – May 2025

- Developed visual concepts and advertising materials for small and medium-sized businesses from initial idea through production.
- Created animation and video assets for LED screens and digital advertising, working on an average of 15+ projects per month.
- Designed logos and brand identities for digital, outdoor and print channels; identities were used in 10+ commercial projects.
- Prepared large-format production files in CorelDRAW, accounting for materials and supplier requirements; supported projects through quality checks before installation.
- Created templates and reusable elements; used Photoshop, Firefly, Midjourney, Stable Diffusion and ChatGPT for image and copy development.

Meloman | Graphic Designer
June 2022 – July 2023

- Developed visual concepts and advertising materials for digital campaigns, social media and retail stores.

- Led the visual relaunch of Meloman’s Instagram account with more than 90,000 followers; engagement increased by approximately 40% after the update.
- Created more than 50 advertising designs, including posters, key visuals and POS materials for digital channels, storefronts and shopping centers.
- Supported new store launches through visual concepts, visitor navigation, interior and brand-zone design; created logos and graphics for internal products.
- Prepared print files and supervised prepress production.
